

Capabilities Statement

Welsh Commissioning Group
a Division of Performance Validation, Inc.

About WCG

WCG has provided full-time third-party commissioning services since 1999. We have proven experience successfully commissioning nearly 1000 facilities across the US, including over 400 with sustainable certifications such as LEED.

Our vision has remained consistent since then; to ensure that facilities are designed and constructed as owners expect and need them to be. We have successfully built our business on a commitment to assure that their facilities function as they were intended while staying within budgetary parameters. As a testament to this, 76% of our work comes from repeat customers and referrals.

Core Competencies

- » Building systems commissioning, new construction & modernizations
- » Existing building commissioning and re-commissioning
- » Ongoing and Monitoring-based commissioning
- » Building system surveys and diagnostics

Qualifications

- » Total Building Commissioning and USGBC LEED certification support
- » BCCB Certified Commissioning Professionals (CCP)
- » AABC Certified Commissioning Authorities (CxA)
- » Licensed Professional Engineers
- » LEED Accredited Professionals

Differentiators

- We develop a complete understanding of the Owner's Project Requirements and ensure all steps in the commissioning process reflect their needs.
- We perform detailed peer reviews of the design to assure that the project documents related to commissioned systems are accurate and provide a clear picture of the systems to be built.
- We identify hidden and subtle issues not necessarily obvious to others and provide proactive solutions.
- Issues are not left unchallenged; we leave clients with a plan for resolution.
- We utilize a team-based approach to commissioning and strive to make every member of the team successful.
